Richard Croker has indorsed the selection of Assemblyman Charles C. Wissel of Newtown as Democratic leader in Queens. They explain that they want to send a courteous answer to Gen. Wood, though it is suspected by some that their intention is to criticise the message. The Nuevo Pais calls the attention of the con-

vention to the condition of the municipalities of the island. It says the delegates should reorganize the municipal law and suppress those municipalities that are not relf-supporting. Many of the present ay untamientos are burdens on the State. By abolishing these the rural bureaucracy, which is so injurious to the country, would be lessened. In spite of the heavy municipal charges since 1878 scarcely any useful works have been carried out, nearly all the municipal incomes having been absorbed in personal or other expenses which were merely auxiliary. In 1890 the personal expenses of the municipalities were \$838,638, while only \$322,000 was expended on public works.

Some of the Havana trades unions have

petitioned delegates to the convention to introduce a clause in the constitution protecting Cuban workmen against foreigners. The petition says that during the Spanish regime Cuban workmen were compelled to leave the island because foreigners got all the employment. The petition is aimed principally at the Spanish eigarmakers.
